

NITO ERGO Water Gun

Ergonomic design. Heat-protecting lightweight spray gun that can be used for several hours.

Design allows long-duration use without the handle overheating.

The NITO ERGO is a hot-water spray gun designed for long-duration use. The gun is made from a chemical-resistant composite material that ensures low weight. The handle is designed to not get hot, and the low weight makes it good for long term use.

Benefits:

- The shape of the gun ensures thermal protection of the handle.
- The trigger is protected against unintentional activation – ensures safety!
- The trigger can be locked – this is an advantage for long-duration use.
- Infinitely variable flow regulation optimises the quantity of water, whatever the task. Made of impact-resistant composite material with a high resistance to chemicals
- Low working load due to the ergonomic design and very low weight
- A product that ensures high user satisfaction.

Manufactured at our own factory in Denmark

Technical specifications:

Water pressure: Max. 10 bar

Water temperature: Max. 80 C°

Water flow:

26 L/min. (2,5 bar)

50 L/min. (5 bar)

58 L/min. (7,5 bar)

Weight: 500 g

Material: Chrom-plated brass HS 58

Seal: NBR

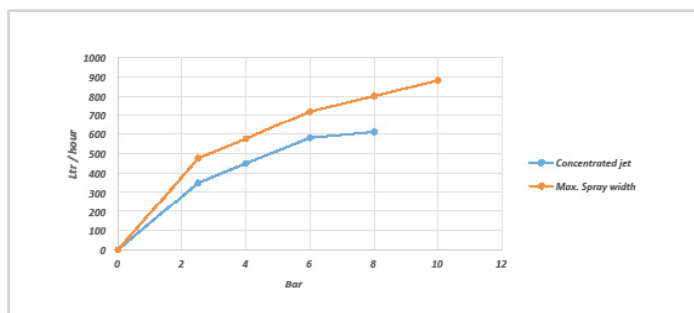

Plastic parts: TPE-TSG2-Santoprene
