

# Automotive Tubing & Hose

## Heat 10bar EPDM Car Heater Hose SAEJ20R3

- Long length extruded hot water hose fully complying with SAEJ20R3 specifications.
- Both inner tube and cover are manufactured from EPDM rubber which gives an excellent temperature range of -45°C to +125°C.
- EPDM also offers excellent resistance to UV and Ozone attack which is accelerated at elevated temperatures.
- Applications include radiator & coolant lines up to 10bar pressure.
- Excellent flexibility which assists routing of pipelines in confined areas.

**Tube:** Black, heat-resistant EPDM rubber.

**Reinforcement:** Synthetic textile.

**Cover:** Black, heat and ozone resistant EPDM.

**Application:** For the conveyance of hot water for vehicle use.

**Specification:** SAE J20 R3

Part Number	ID inch	ID mm	OD mm	Max Working Pressure bar	Burst Pressure bar	Bend Radius mm	Coil Length mtrs
2020-9276	3/8"	10	17	10	30	100	20
2020-9284	1/2"	13	20	10	30	130	20
2020-9292	5/8"	16	23	10	30	160	20
2020-9300	3/4"	19	28	10	30	190	20
2035-3637	1"	25	34	10	30	250	20

**Temperature Range:**  
-35°C to +100°C

**Maximum Working Pressure:**  
9 bar
