

FEATURES

- **EASY TO USE**
- **NO POWER SOURCE REQUIRED**

PRODUCT DESCRIPTION

The Sidas Manual Foot Scanning Machine has been developed to make the Sidas 3Feet Footbeds the most accessible in the industry.

It uses heat impression to clearly measure and highlight a wearer foot arch shape.

A handy simple guide is issued alongside the equipment.

This enables trade counter staff, sales representatives and even the wearers themselves to identify the correct arch type for them.

Our studies show that more than 15% of customers that measure their feet go on to make a purchase, so remove the barriers by providing this easy, almost self service tool.
