

## AS001/BioPU SUSTAINABLE ANTI-FATIGUE FOOTBED

**Specification:** Suitable for requirements: Anti-Static, ESD  
Size UK 2-16

### FEATURES

Anti-Static

ESD Certified

Larger Sizes

Smaller Sizes

### PRODUCT DESCRIPTION

The Activ-Step® BioPU anti-fatigue footbeds have been developed to reduce foot fatigue.

Utilising technology found in Anti-Fatigue matting with sustainability sourced materials, it is a highly versatile accessory.

**USDA CERTIFIED BIOBASED PRODUCT- 29%- ONE OF ONLY 4 APPROVED MANUFACTURERS FIRST IN THE UK.**

The footbed is made of 29% sustainably sourced bio sweet corn oil. The polyester top is made from 100% post consumer recycled plastic bottles, with wearing performance that is higher than normal industry standards.

Recycled and recyclable packaging, printed with soy ink.

### Size Chart

UK 2-4	<b>S</b>
UK 5-7	<b>M</b>
UK 8-10	<b>L</b>
UK 11-13	<b>XL</b>
UK 14-16	<b>XXL</b>

### PRODUCT FEATURES

**Anti-Static:** Anti-static shoes have an electrical resistance between 0.1 and 1000 Mega ohms (M), measured according to EN 20344:2022+A1:2024. This value is a compromise between good protection from electrical shocks and sufficient dissipative capacity. These shoes may be worn in many different work environments.

**ESD:** ESD (Electrostatic Dissipative) shoes have an electrical resistance between 0.1 and 100 Mega ohms (M), measured according to BS EN 61340-4-3: 2018 (IEC 61340-4-3: 2018) ESD shoes are thus guaranteed to have an extremely low electrical resistance under any conditions in order to prevent a strong, uncontrolled electrostatic charge.

ESD and Anti-static properties are void when used in conjunction with footwear conforming to ASTM F2413-24 Electrical Hazard Specification
