

FEATURES

Anti-Static

Arch Support

ESD Certified

PRODUCT DESCRIPTION

Activ Step Tri-Shift Work footbeds are designed to support common foot conditions which include:

Plantar Fasciitis, Fatigue, Achilles Tendonitis, Pronation/Supination, Instabilities and back and knee pain.

They have been specifically designed for industrial workplaces and include anti-static stitching for product assurances purposes.

The footbeds are multi-layered and built up to offer cushioned comfort with a tailored arch support based on the wearers foot type.

UK 8-9	L
UK 10-11	XL
UK 12-13	XXL
UK 14-16	XXXL

PRODUCT FEATURES

Anti-Static: Anti-static shoes have an electrical resistance between 0.1 and 1000 Mega Ohms (M), measured according to EN 20344+A1:2024. This value is a compromise between good protection from electrical shocks and sufficient dissipative capacity. These shoes may be worn in many different work environments.

ESD: ESD (Electrostatic Dissipative) shoes have an electrical resistance between 0.1 and 100 (M), measured according to BS EN 61340-4-3: 2018 (IEC 61340-4-3: 2018). ESD shoes are thus guaranteed to have an extremely low electrical resistance under any conditions in order to prevent a strong, uncontrolled electrostatic charge.

ESD and Anti-static properties are void when used in conjunction with footwear conforming to ASTM F2413-24 Electrical Hazard Specification.
